1. CUSTOMER WEBSITE (FRONTEND)

Public website that customers will browse, shop, and place orders on.

Homepage

- Hero banner with tagline and product highlights
- "We Sell What We Eat" scrolling marquee
- Founder story teaser section
- Trust badges — FSSAI certified, Lab tested
- Customer testimonials section
- Farm-to-Kitchen 4-step visual journey

Product Listing Page

- Product grid with category filters — Atta, Rice, Spices
- Search bar and sort by price / newest
- Mobile-friendly card layout

Product Detail Page

- Image gallery with zoom
- Weight variant selector (e.g. 1kg, 5kg, 10kg)
- "Milled After Order" badge
- Nutrition table and gluten comparison
- Origin details — village, harvest year, farmer name
- Lab report PDF download (NABL certified)
- QR code linking to YouTube farm journey video

Cart & Checkout

- Shopping cart saved across sessions
- Address form and order summary
- Razorpay payment — cards, UPI, netbanking
- Cash on Delivery (COD) option
- "Order via WhatsApp" button with pre-filled cart message
- Order confirmation page after payment
- WhatsApp notification to customer on order placed

Customer Account

- Register / login with OTP via SMS
- Order history with live status
- Saved delivery addresses

Other Pages

- Our Story — founder cards, cricket origin story, farm photos, brand values
- Farm to Kitchen — 4-step journey with embedded YouTube video
- Contact — WhatsApp button, inquiry form, store address, social links
- /journey route — QR redirect to YouTube video (changeable from admin)

2. BACKEND & APIS

Server and database that powers both the customer website and admin panel.

Core Setup

- Node.js + Express server
- MongoDB database — Products, Orders, Users collections
- JWT-based login with OTP authentication via SMS
- Cloudinary for product images and PDF uploads
- Deployed on Railway with environment-based config

APIs Built

- Products — list, filter by category, search, detail page
- Orders — create order, update status, fetch order history
- Users — register, login, manage saved addresses
- Razorpay webhook — payment verification and order confirmation
- Notifications — WhatsApp + email triggers on order events
- Admin settings — update journey video URL and site config

3. ADMIN PANEL

Private dashboard for the Hadoti Farms team — manage everything without touching code.

Orders & Milling

- View all orders with customer and product details
- Update order status — Received → Milling → Packed → Dispatched
- Log milling date per order (shown on customer invoice)
- Filter and search orders by status, date, or customer

Products & Inventory

- Add, edit, and delete products
- Upload product images and lab report PDFs
- Manage weight variants and stock levels
- Set origin details — village, farmer, harvest season and year
- Mark products as featured or inactive

Customers

- View full customer list with order count and history

Settings

- Update YouTube journey video URL without any code change
- Configure WhatsApp number and site-wide preferences
